

## Instructions for converting a document into a PDF.

1. Open the document.
2. Go to File
3. Go to Print
4. Instead of choosing a printer from the drop down menu, choose Adobe PDF.
5. Click ok
6. A dialogue box will pop up that says “Save PDF File As”, name it, and save it. (I usually just save it to the desktop if I’ve got the original file saved to the server.)
