

2010 State Science Olympiad Results

Blevins' Science Olympiad teams competed at the Colorado State tournament in Golden Saturday. Blevins' second team had to scramble to fill positions when two members were unable to make it. They hung in there and showed great team work and effort but were unable to overcome such obstacles. Blevins' first team took more first place medals than any other team placing fourth overall. Individual medals went to the following people:

Battery Buggy: 1st place - Alex Barrett and Claire O'Brien

Compute This: 1st place - Max Dielman and Trevor Hartman

Ecology: 1st place - Laura Lenczycki and Max Dielman

Elevated Bridge: 2nd place - Max Dielman

Experimental Design: 1st place - Alex Barrett and Max Dielman

Physical Science Lab: 1st place - Alec Krausse and Laura Lenczycki

Shock Value: 3rd place - Adam O'Neill and Jared Cross

Solar System: 2nd place - Grant Wray and David O'Neill

Trajectory: 3rd place - Duncan Schenckel and Tommy O'Neill

Good job to all team members for their efforts over a long season. Mr. Viney and Mrs. Lovaas are proud and looking forward to next year.
